

SECOND ECCOMAS THEMATIC CONFERENCE

on

# Meshless Methods

Faculty of Engineering of the University of Porto

July 9 - 11, 2007

Edited by INEGI Edições  
ISBN - 978-972-8826-12-3

## Preface

This text presents all papers submitted and approved for the SECOND ECCOMAS THEMATIC CONFERENCE ON MESHLESS METHODS, held in Porto, Portugal, from July 9 to 11, 2007.

The objectives of this Conference are: to present the up-to-date state-of-the-art in the field of meshless methods and other mesh reduction methods; to encourage discussion and to contribute to new developments in this field.

This conference is a sequence of Meshless 2005, organized by Vitor Leitão, Carlos Alves and Carlos Duarte.

July 2007

António Ferreira, Greg Fasshauer, Edward Kansa, Vitor Leitão  
Conference Co-Chairs

# Organization

The Second ECCOMAS Thematic Conference on Meshless Methods 2007 is organized by the Engineering Faculty of the University of Porto, in collaboration with the Illinois Institute of Technology, Chicago, The University of California at Davis and the Instituto Superior Técnico of Lisbon.

## Conference Co-Chairs

António Ferreira	FEUP, University of Porto, Portugal ferreira@fe.up.pt
Edward Kansa	UC-Davis, University of California-Davis, USA ejkansa@ucdavis.edu
Vitor Leitão	IST, Technical University of Lisbon, Portugal vitor@civil.ist.utl.pt
Gregory Fasshauer	IIT, Illinois Institute of Technology, USA fasshauer@iit.edu

## Scientific Committee

C. J. S. Alves	Instituto Superior Técnico, Portugal
N. R. Aluru	University of Illinois at Urbana-Champaign
Ivo Babuska	University of Texas at Austin , USA
K. J. Bathe	Massachusetts Institute of Technology, USA
R. C. Batra	Virginia Tech. ,USA
Ted Belytschko	Northwestern University, USA
Martin Buhmann	Justus-Liebig-University, Germany
C. S. Chen	University of Southern Mississippi, USA
J. S. Chen	University of California, Los Angeles, USA
J. T. Chen	National Taiwan Ocean University, Taiwan
Wen Chen	Inst. Applied Physics Comput. Math., China
Suvranu De	Rensselaer Polytechnic Institute, USA
C. A. Duarte	Univ. of Illinois at Urbana-Champaign, USA
Csába Gaspar	Szechenyi Istvan University, Hungary
Ismael Herrera	Univ. Nacional Autonoma de México, Mexico
Y. C. Hon	City University of Hong Kong, China
Antonio Huerta	Universitat Politècnica de Catalunya, Spain
Armin Iske	University of Hamburg, Germany
Sergio Idelsohn	Universidade del Litoral, Argentina
Eisuke Kita	Nagoya University, Japan
J. A. Kolodziej	Poznan University of Technology, Poland
K. M. Liew	City University of Hong Kong, China
Gui-Rong Liu	National University of Singapore, Singapore
Wing Kam Liu	Northwestern University, USA
Nicolas Moes	École Centrale de Nantes, France
D. E. Myers	University of Arizona, USA
Eugenio Oñate	Universitat Politècnica de Catalunya, Spain
P. W. Partridge	University of Brasília, Brazil
Sérgio Proença	University of São Paulo, Brazil
José César de Sá	University of Porto, Portugal
Bozidar Sarler	Nova Gorica Polytechnic, Slovenia
Robert Schaback	University of Goettingen, Germany
Jan Sladek	Slovak Academy of Sciences, Slovakia
Vadim Shapiro	University of Wisconsin-Madison, USA
Chang Shu	National University of Singapore, Singapore
A. I. Tolstykh	Russian Academy of Sciences, Russia
T. Tran-Cong	University of Southern Queensland, Australia
Zongmin Wu	Fudan University, China
G. Yagawa	University of Tokyo, Japan

## **Sponsoring Institutions**

Faculdade de Engenharia da Universidade do Porto  
Instituto de Engenharia Mecânica e Gestão Industrial  
Instituto de Engenharia Mecânica-Polo FEUP  
Fundação para a Ciência e a Tecnologia  
Instituto Superior Técnico  
University of California at Davis  
Illinois Institute of Technology  
Associação Portuguesa de Mecânica Teórica, Aplicada e Computacional  
ECCOMAS  
Fundação Oriente  
Fundação Luso-America para o Desenvolvimento  
Fundação Calouste Gulbenkian  
Universidade do Porto

## Table of Contents

Meshless Numerical Methods for Problems of Hydrodynamics with Free Boundaries . . . . .	1
<i>K. E. Afanasiev and I. V. Grigorieva (Kemerovo State University)</i>	
The Method of Fundamental Solutions Applied to the Calculation of Eigensolutions in 2D Plates . . . . .	8
<i>Carlos Alves, Pedro Antunes (Instituto Superior Técnico)</i>	
On the Determination of a Robin Boundary Coefficient in an Elastic Cavity using a Newton-MFS Method . . . . .	15
<i>C. Alves (Instituto Superior Técnico) and N. Martins (U. N. Lisbon)</i>	
Solution of Spillways Flow by Discrete Least Square Meshless Methods . . . . .	22
<i>H. Arzani (Shahid Rajaei University) and M.H. Afshar (Iran University of Science)</i>	
A Method for Poisson Problems . . . . .	35
<i>B. Bacchelli and M. Bozzini (University of Milano-Bicocca)</i>	
Meshless Solution of Isothermal Hele-Shaw Flow . . . . .	41
<i>Francisco Bernal, Manuel Kindelan (Universidad Carlos III de Madrid)</i>	
Radial Basis Function Interpolants . . . . .	50
<i>Martin Buhmann (Justus-Liebig University), Slawomir Dinew (Jagiellonian University)</i>	
Orbital HP-Clouds for Solving Schrödinger Equation in Quantum Mechanics . . . . .	51
<i>J. S. Chen and W. Hu (University of California)</i>	
A New Meshless Method for Engineering Problems with Circular Boundaries . . . . .	63
<i>J. T. Chen (The Hong Kong Baptist University)</i>	
Smoothing Approaches in Constructing Kernel Radial Basis Functions . . . . .	64
<i>W. Chen (Hohai University), H. Wang and Q.-H. Qin (Tianjin University)</i>	
Visualization Of Meshless Simulations Using Fourier Volume Rendering . . . . .	65
<i>A. Corrigan, J. Wallin (George Mason University)</i>	
Multiscale Modeling Using Meshfree Enrichments . . . . .	71
<i>S. De (MANE, RPI, Troy), M. Macri (Union College)</i>	
Free Vibration of Plates Resorting to the Natural Neighbour Point Interpolation Method . . . . .	79
<i>Lucia Dinis, Renato Jorge (University of Porto) Jorge Belinha (IDMEC)</i>	

Elasto-plastic Analysis Resorting to Meshless Methods . . . . .	86
<i>Lucia Dinis, Renato Jorge (University of Porto) Jorge Belinha (IDMEC)</i>	
Application of Radial Point Interpolation Method for Static Analysis of Shear Deformable Laminated Composite Plates . . . . .	104
<i>A. Djeukou (Airbus), O. v. Estorff (Hamburg University of Technology)</i>	
Preconditioning of Radial Basis Function Interpolation Systems via Accelerated Iterated Approximate Moving Least Squares Approximation . . . . .	116
<i>G. E. Fasshauer, J. G. Zhang (Illinois Institute of Technology)</i>	
Analysis of Tensile Structures with the Element Free Galerkin Method . . . . .	123
<i>B. Figueiredo and V. M. A. Leitão (Instituto Superior Técnico)</i>	
A Meshless Solution Technique of Stokes Flow Equations . . . . .	134
<i>C. Gáspár (Széchenyi István University)</i>	
Mathematical Model of the Thermal Behaviour of Textile Structures . . . . .	140
<i>M. J. Geraldès, N. Belino, M. Nunes (University of Beira Interior)</i>	
Use of Image Texture Analysis to Characterize Needle-punched Nonwoven Structure: Statistical Method . . . . .	143
<i>M. J. Geraldès, N. Belino, M. Nunes (University of Beira Interior), M. E. C. Silva (University of Minho)</i>	
A Higher-order Natural Element Method . . . . .	144
<i>D. González, E. Cueto and M. Doblaré (University of Zaragoza)</i>	
A Strategy to Deal with Contact and Friction in Forging Processes . . . . .	149
<i>Cristina Faria Guedes and José M. A. César de Sá (Faculdade de Engenharia da Universidade do Porto)</i>	
Comparison of Several Numerical Schemes based on Kansa's Method to Solve an Initial Boundary Value Problem . . . . .	163
<i>G. Gutiérrez R. (Universidad Popular del Cesar) and W. F. Florez (Universidad Pontificia Bolivariana)</i>	
Reproducing Kernel Enhanced Local Radial Basis Collocation Method . . . . .	175
<i>H. Y. Hu (Tunghai University), J. S. Chen, W. Hu (University of California)</i>	
On Application of a Meshless Approach to Analysis of Shell-like Structures . . . . .	189
<i>Tomislav Jarak, Jurica Sorić, Josip Hoster (University of Zagreb)</i>	
Mixed MLS/Hermite MLS Approximation for Discretizing Fourth-order Partial Differential Equations Encountered in Beam and Plate Models . . . . .	197
<i>P. Joyot (LIPSI, ESTIA technopole izarbel), F. Chinesta (LMSP UMR 8106 CNRS-ENSAM), P. Villon (UTC) B. Khoshnoudirad (LIPSI, ESTIA technopole izarbel and LMSP UMR 8106 CNRS-ENSAM)</i>	

Exact Time Integration of Hyperbolic PDEs using Radial Basis Functions . . . . .	205
<i>E. K. Kansa (University of California, Davis)</i>	
Meshless based Quasi-static Analysis of Elevated Coplanar Waveguides . . . . .	211
<i>S. Kanthamani, S. Raju, and V. Abhai Kumar (Thiagarajar College of Engg. Madurai-15)</i>	
On Numerical Algorithms of Asymmetric RBF Collocation Method . . . . .	223
<i>Leevan Ling (The Hong Kong Baptist University)</i>	
An Extension of the Exponential-type Error Bounds for Multiquadric and Gaussian Interpolations . . . . .	227
<i>Lin-Tian Luh (Providence University)</i>	
MLPG Method using kd-Trees and its Application to Flamant Problem . . . . .	232
<i>R. Ossowski and Z. Sikora (Gdansk University of Technology)</i>	
The Finite Cell Method for Singular Cases in Solid Mechanics . . . . .	237
<i>J. Parvizian (Isfahan University of Technology), A. Düster and E. Rank (Technische Universität München)</i>	
Non-linear Material Behaviour Analysis using Meshless Finite Point Method . . . . .	251
<i>L. Pérez-Pozo, F. Perazzo (Technical University of Federico Santa Maria)</i>	
A Meshless Approach for the Analysis of Orthotropic Shells using a Higher-order Theory and an Optimization Technique . . . . .	269
<i>C. M. C. Roque, A. J. M. Ferreira, R. M. N. Jorge (Faculdade de Engenharia da Universidade do Porto)</i>	
A Posteriori Error Bounds for Meshless Methods . . . . .	280
<i>Robert Schaback (Universität Göttingen)</i>	
2-D GRKPM: Analysis of the Kirchhoff Plate . . . . .	286
<i>H. M. Shodja and A. Hashemian (Sharif University of Technology)</i>	
Meshless Local Integral Equation Method for Multi-field Problems . . . . .	294
<i>J. Sladek, V. Sladek (Slovak Academy of Sciences), Ch. Zhang (University of Siegen)</i>	
An Order- $N$ Explicit Time-stepping Formulation based on Local Hermitian Interpolation Method for Transient Problems . . . . .	302
<i>David Stevens, Henry Power, Herve Morvan (The University of Nottingham)</i>	
On the Local Enforcement of Dirichlet Boundary Conditions in Meshless Methods . . . . .	317
<i>C. Tiago and V. M. A. Leitão (Instituto Superior Técnico)</i>	

A Hybrid FDM–MFS Method for the Numerical Solution of Heat Conduction Problems .....	324
<i>S. S. Valtchev(Instituto Superior Técnico), N. C. Roberty ( Universidade Federal do Rio de Janeiro)</i>	
Using SPH for Modelling Fluid Flow through Cellular Structures.....	331
<i>Matej Vesenjak and Zoran Ren(University of Maribor)</i>	
Modelling of Fluid Sloshing Problems.....	339
<i>Matej Vesenjak and Zoran Ren(University of Maribor)</i>	
Application of Bézier Surfaces to Investigation of a Non-stationary Flow in Narrow 2D Regions of Irregular Shape .....	347
<i>J. Zapomel(Technical University of Ostrava)</i>
